

# BJA Building Analytical Capacity Crime Analysis Webinars

The International Association of Directors of Law Enforcement Standards and Training (IADLEST) provides a series of live interactive 1.5-hour online workshops in which agency teams of executives, commanders, and analysts create customized action plans to address specific crime analysis challenges within their departments. The webinars assist top commanders and their teams in identifying how to support actionable analysis within their own departments and use that analysis to drive operations. The topic areas are consistent with the IADLEST Intensive 2-Day Workshops.

**Monday, November 21, 2016: 2:00 PM - 3:30 PM EST**

## 12 Questions Executives Should Ask About Their Crime Analysis Capabilities

### Course Information:

This session is meant for police commanders and executives who want to take an active role in the development or re-development of their crime analysis capabilities. Many executives come to their positions having “inherited” a crime analysis program started by one of their predecessors, with resources and means of doing business that may have made sense at the time, but no longer fully serve the needs of the agency. This webinar introduces 12 key questions that all executives should ask about their crime analysis programs to ensure that the needs of both the analysts and the agency are being met. Topics include the organizational positioning of the crime analysis function, training and professional development, and better synthesizing analysis and operations.

### Instructor:

Christopher W. Bruce was a crime analyst for 17 years in Massachusetts, for the Danvers (MA) Police Department (2001–2010) and the Cambridge (MA) Police Department (1994–2001). Throughout his career, he has been extremely active in the crime analysis community, as president of the International Association of Crime Analysts (2007–2012), vice president of the IACA (2000–2006), and president of the Massachusetts Association of Crime Analysts (2000–2004). He frequently provides conference presentations on crime analysis and week-long training classes on topics such as crime mapping, spatial statistics, and the Microsoft Office applications. Since 2011, Christopher has been the Analytical Director for the Data Driven Approaches to Crime and Traffic Safety (DDACTS) program, providing workshops, training, and technical assistance through the International Association of Directors of Law Enforcement Standards and Training (IADLEST).
