

DDACTS 2.0 Webinar Series

Throughout 2021 IADLEST is hosting a series of NO-COST 1-hour webinars on using data to manage and deploy resources to decrease crashes, crime, and other social harms.

Guiding Principle #5 Strategic Operations *July 22nd @ 2pm EDT*

HVE or HVE? The DDACTS model can help your agency plan and deploy your resources more effectively in your hotspots and ensure your officers understand their specific role in crash and crime reduction.

This is the sixth webinar in an 8-part series on DDACTS 2.0. Recordings of previous webinars in the series are available.

Training Objectives

1. Determine how the DDACTS model can be used as an agency tactic, strategy, and cultural philosophy.
2. Compare and contrast the benefits of an agency-wide, data-driven approach to social harm reduction.
3. Identify, then develop non-law enforcement solutions to law enforcement problems.
4. Indicate how the DDACTS strategy achieves reductions in crashes, crimes, and other social harms.
5. Discern the difference between high visibility enforcement vs. *engagement* and strategies to increase positive contact.

Presenters

Peggy Schaefer (Host) -- IADLEST Project Manager, NHTSA DDACTS. Peggy served as Director of the North Carolina Justice Academy, serving over 85,000 officers.

Daniel Howard (Host) -- IADLEST Project Manager, TxDOT DDACTS. Daniel is a retired police commander with more than 35 years in public safety and a DDACTS SME since 2011.

Maj. David Bowen (Guest Speaker) -- Greenville, NC Police Department. Cmdr. Adapted the DDACTS model for Greenville in 2014. DDACTS SME and FBINA graduate.

Lt. Thomas Smith (Guest Speaker) -- Killeen, TX police officer since 1995. DDACTS SME since 2016 and graduate of FBINA.
