

BUILDING ANALYTICAL CAPACITY WEBINAR SERIES

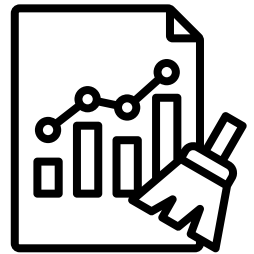

Webinar 1: Obtaining and Cleaning Data for Data-Driven Operations

Tuesday, 19 December 2023, 13:00 CST

This first in a series of five webinars tackles perhaps the most fundamental question for a crime or crash analyst: Where do I get my data in the first place? We take a look at common police crash databases, computer-aided dispatch, and records management systems and look at methods of linking and exporting data from them so it can be properly analyzed with common tools, like Microsoft Access, Microsoft Excel, and ArcGIS Pro. The class also looks at techniques for identifying problems with datasets and cleaning bad data.

Christopher Bruce

Christopher W. Bruce is a trainer and consultant with expertise in police data systems, crime analysis, and data-driven strategies to reduce crime. He was a crime analyst for 18 years and for the last 13 years, he has provided consulting and training through a variety of nonprofit associations and government agencies. In 2019 he became a full-time assistant professor of criminal justice at Husson University in Bangor, ME.
