Webinar #4: Spatial Analysis

Discover the value of mapping data, what is needed within the data to map points, and the value of displaying crashes, crimes, and other data in spatial contexts to effectively deploy resources.

Led by instructors **Debra Piehl**, IADLEST DDACTS Analytical Director, and **Craig Spingarn**, Senior Analytical Specialist for the Denver Police Department, this four-part webinar series is specifically intended for the analyst who may be **new** to the analysis profession and may simultaneously be supporting a law enforcement agency that is new to analysis-driven operations. This series will guide new analysts and analysts in agencies that are new to conducting analysis on how best to provide actionable analysis on crashes, crimes, and other social harms.
