DESIGNING EVALUATION TOOLS
(RUBRICS)

What Does "Good" Really Look Like?

- *That's the question we will help to answer during October's webinar.*

- *Trainers are more successful when they have a clear picture of the performance they want to see from students.* *Likewise, students need to know what is expected from them to meet or exceed performance standards.*

Together we will walk through the process of designing a simple "Rubric" evaluation to include evaluation criteria, rating scales, and minimum performance standards that will help you and your organization achieve some consistency and improve performance.

About Your Webinar Host....

Captain Jim Gordon (Ret.)

Jim Gordon is a retired captain from Stanislaus County Sheriff's Office in Central California, with 25 years of service. Jim served as a field training officer and as the FTO program administrator. After promoting to lieutenant, Jim served as the regional academy director where he spearheaded the design into one of California's first fully integrated, scenario based training programs.

Jim is a graduate of the California POST Master Instructor Program. He holds an Associate Degree in Administration of Justice, a Bachelor's Degree in Vocational Education, and a Master's Degree in Adult Education. Jim also worked with the CA POST Instructor Development Team teaching instructional technology and instructor development all over California. Jim now resides in Wyoming with his family.
