# Delivering Open Source Intelligence Training

OVERVIEW:

The one-hour webinar will focus on the challenges public safety training institutions face when delivering Open Source Intelligence Training. It will start by defining what OSINT is and how Law Enforcement and Intelligence agencies use it to assist in their work. It will continue with lessons learned from the KeyNorth Group in designing content, including what to teach to which groups, and the challenges when teaching either in-class or remotely. At the end of the webinar, we will discuss our views on some possible scenarios for the future of Open Source Intelligence Training.

LEARNING OBJECTIVES:

At the end of this webinar, the student will be able to:

• Discuss the user groups and target audiences for OSINT training.

• Identify the challenges in designing and delivering OSINT training.

• Recognize general trends in the future Open Source Intelligence Training.

CHRIS PIERRE

Chris Pierre, CFE, CISSP is the Managing Director of the KeyNorth Group. His experience includes 20 years of OSINT research, complex commercial investigations, fraud investigations and risk management engagements in both the public and private sectors. Chris has worked with multiple agencies in the provision of training, drafting investigation policies and procedures, resourcing requirements, and negotiating with internal stakeholders, particularly in their use of OSINT.

LORENA RIVERA

Lorena Rivera, MSc. is the Knowledge Management, Training and Community Manager at the KeyNorth Group. She has nearly 15 years of experience as a mixed data researcher. Since joining the KeyNorth Group two years ago, she has managed the learning experience of over 1000 OSINT learners, as well as 500 OSINT community members, the majority of whom were from the public sector. She was also one of the designers of the various OSINT assessment tools utilized by the firm.
