Introduction to the Functionality of AI
Tools for Designing Training

Thursday, May 16
1:00 PM – 2:00 PM ET

2024

IADLEST
International Association of Directors of Law Enforcement
Standards & Training

LEARNING OBJECTIVES:

- Recall the functionality of AI and LLMs, and their applications in training design.
- Discuss the risks of using AI for designing training and how to mitigate them.
- Outline some of the tools currently available to assist in designing training.

OVERVIEW:

Artificial Intelligence (AI) has been a hot topic for over a year now. There are some causes for concern with this technology, but it is also presenting us with opportunities to enhance and increase the speed of our workflow. This webinar will be presented by a front-end user, not a tech wizard. We will discuss the capabilities, limitations, and risks of AI.

Then do a live demonstration of how to utilize a large language model (LLM) to assist in the training design process and look at a few tools that can be used for training development.

Speaker:

KERRY AVERY

KERRY AVERY

Kerry is the owner of Odin Training Solutions Inc. She has a master's degree in education and 20 years' experience designing training programs, with the last 15 years spent working with law enforcement agencies to develop classroom, online and blended learning courses. In addition to course development, Kerry coaches and teaches law enforcement instructors on course design and facilitation and teaches for the Certificate in Adult and Continuing Education program at the University of Victoria. She has worked with law enforcement agencies in Canada, the United States, and contracted internationally with Amentum for ICITAP in Central America and Ukraine. Kerry is the managing editor for the ILEETA Journal, and has presented at the IACP, IADLEST, ILEETA and NAFTO conferences.
